Vladyslav Kalynchneko

Software Engineer

vladyslav.kalynchenko@gmail.com| linkedin.com/in/vladyslav-kalynchenko-531a20277/

Summary

I am a fourth-year student at PJATK with an experience in software development. I have solid programming skills in **Java**, **C#, JavaScript**, **SQL** databases. Most of my projects are in web development, using frameworks like **Spring Boot**, **Angular**, and **ASP.NET**. Completed the AWS Academy Cloud Foundations course, earning the **AWS Academy Graduate** certification. Recently received **Azure Associate Administrator** certification.

Skills

Technical Skills: Java, Spring Boot, JPA/Hibernate, Microservices, Javascript, HTML, CSS, SQL, Maven, Docker, REST API, GIT, AWS, Linux(Ubuntu, Debian), C#, .NET, NoSQL(CassandraDB, MongoDB).

Experience

Grid Dynamics, Junior Software Engineer
Warsaw
June/2025 – Present

As a Java junior, I am gaining hands-on experience with **Java**, **Spring Framework**, software development process, and **UML**. This role involves learning and applying core **Java concepts**, understanding the principles of object-oriented programming and deepening my **Spring Framework** knowledge.

Projects

- [Website](#) project, fully deployed and configured by me. Backend is written in **Java**, **Spring Boot**, frontend is written in **Angular**. First experience in deploying a website(cloud provider: Hetzner). [Backend](#) and [Frontend](#) are available for public on my **GitHub**. The project has features like **JWT authorization, CMS and CMR.** [Backend Link Frontend Link](#)
- **SPA** Website is made to demonstrate my knowledge and skills in **.NET** and **Angular**. I'm responsible for making design, building front-end and back-end, using **.NET**, and **Angular**. It is a simple website with **JWT authorization** displaying data from relational database with the ability to modify, create and delete data. [LINK](#)
- Website for Law Firm. This is my first commercial experience in web development. For this project I use **Spring Boot** (Backend) and **Angular** (Frontend). This is a solo project, so I am responsible for design and software. The project has features like **JWT authorization, CMS and CMR.** [Backend Link Frontend Link](#)
