Summary

First-year Master's student in Computer Science at PJATK, with experience in software development. Skilled in **Java, C#, JavaScript, SQL/NoSQL** databases. Experienced in back-end development with Spring Boot, including projects based on microservice architecture. Completed the AWS Academy Cloud Foundations course, earning the **AWS Academy Graduate** certification. Recently obtained **Azure Associate Administrator** certification.

Skills

Technical Skills: Java, Spring Boot, JPA/Hibernate, microservices, JavaScript, HTML, CSS, SQL, Maven, Docker, REST APIs, Git, AWS, Linux(Ubuntu, Debian), C#, .NET, NoSQL(CassandraDB, MongoDB), Splunk/OpenSearch, Observability and Monitoring systems.

Experience

Grid Dynamics, Junior Software Engineer

Warsaw

December/2025 – Present

SRE team member specializing in application **performance monitoring**, **incident response** and **bottleneck analysis**. Responsible for **investigating** issues across frontend and backend codebases, **coordinating** with relevant teams, **presenting** findings and **preparing** summary reports.

Grid Dynamics, Junior Software Engineer

Warsaw

June/2025 – December/2025

As a Java intern, I am gaining hands-on experience with **Java, Spring Framework**, software development process, and **UML**. This role involves learning and applying core **Java concepts**, understanding the principles of object-oriented programming and deepening my **Spring Framework** knowledge.

Projects

- Website project, fully deployed and configured by me. Backend is written in **Java, Spring Boot**, frontend is written in **Angular**. First experience in deploying a website(cloud provider: Hetzner). [Backend](#) and [Frontend](#) are available to the public on my **GitHub**. The project has features like **JWT authorization, CMS and CMR**. [Backend Link](#) [Frontend Link](#)
- As one of my personal projects, I build and **maintain server infrastructure** using consumer-grade hardware. My current setup includes a **home lab** with **dedicated server**, self-built **pfSense router**, **VLAN** segmentation, a **DMZ** zone, a **NAS** running in a virtual machine on **Proxmox**, **Home Assistant** for energy consumption **monitoring**, a digital library, and a **DNS server** configured with DNS-over-HTTPS via Cloudflare.
- Currently working on a **thesis project** focused on **bidirectional communication with multiple clients over HTTP**. The project involves **Spring Boot** microservices, Directus **CMS**, a **SQL** database and **Redis** for caching. Its goal is to create a **partition-resilient** real-time product tracking **system**.
- Website for Law Firm. This is my first commercial experience in web development. For this project I use **Spring Boot** (Backend) and **Angular** (Frontend). This is a solo project, so I am responsible for design and software. The project has features like **JWT authorization, CMS and CMR**. [Backend Link](#) [Frontend Link](#)

Education

Polish-Japanese Academy of Computer Technology

Warsaw, Poland

Bachelor's degree in Computer Science

2022 - 2026

University Ranking: 13th among all technical universities in Poland by [Perspektywy](#)

AWS Academy Graduate - AWS Academy Cloud Foundations

03.2022 – 06.2022

[Certificate](#)

Microsoft Azure Administrator (AZ-104)

11.2025-11.2026

[Certificate](#)
